

Hospital General Information Dashboard — User Guide

Key Performance Indicators (KPIs)

KPI	Value	What It Means
Total Hospitals	~5,000	Count of all facilities in the current view
% High-Performing	36%	Hospitals meeting or exceeding the rating threshold
Average Better %	11%	Avg % of measures rated "Better" (Safety + Readmission)
Birthing Friendly %	41%	Hospitals meeting birthing-friendly criteria

Using Slicers to Filter Data

Slicers are dropdown filters on the left side of each page. Use them to narrow the dashboard view:

- **State:** Filter to one or multiple states
- **Hospital Type:** Filter by facility type (Acute Care, Critical Access, Psychiatric, Pediatric)
- **Hospital Ownership:** Filter by ownership (Non-Profit, Government/Public, For-Profit)
- **Emergency Services:** Filter hospitals with or without emergency services
- **Rating Threshold:** Set the minimum rating to define "High-Performing"

"What-If" Scenario Sliders

The Scenario Insights page has interactive sliders to simulate future improvements:

- **Rating Threshold:** Adjust the minimum star rating (1–5) that defines a "High-Performing" hospital. All KPI cards update instantly.
- **Safety Improvement:** Simulate a % increase in Safety "Better" scores. The projected line chart shows the impact.
- **Readmission Improvement:** Simulate a % increase in Readmission "Better" scores to project improvement outcomes.

Tip: Use the "Default" and "Optimistic" bookmark buttons to quickly switch between preset scenarios.

Data Refresh

- **Power BI Desktop:** Click the Refresh button in the Home ribbon. Ensure your CSV source is updated first.
- **Power BI Service:** Scheduled refresh runs automatically based on your organization's configured schedule.

Dashboard Pages

#	Page	Purpose
1	Executive Overview	KPIs, ownership & type distribution, top states by rating
2	Geographic Analysis	Interactive map, hospitals by state, emergency services by state
3	Performance Measure Details	Domain-wise Better/Worse %, hospital-level matrix
4	Scenario Insights	What-If sliders, projected improvement curves, scatter analysis
5	State and Hospital Detail	Drill-down table with individual hospital attributes
